

Bird Netting

AMAZON OVERHEAD CASE STUDY

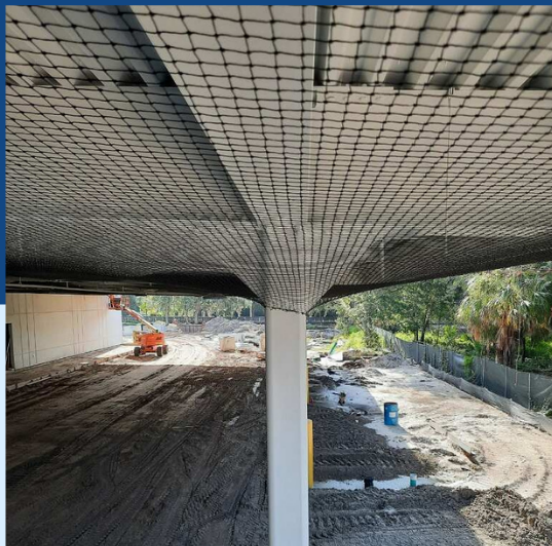

BENEFITS

- Stops Nesting
- Blocks Perching
- Prevents Flocks from Congregating
- Stops Birds from Multiplying

SUMMARY

The goal of this project was to exclude birds from nesting or roosting in the rafters of an overhead canopy at an Amazon warehouse.

AviAway installed bird netting on the interior side of the canopy overhead. This solution was low-visibility and stopped pest birds from being able to nest.

AVIAWAY

AviAway is a full-service bird control installation company. Call us today at 844-247-3373 to set up a free bird control consultation.
