

CASE STUDY – SEAGULL GRID WIRE SYSTEM

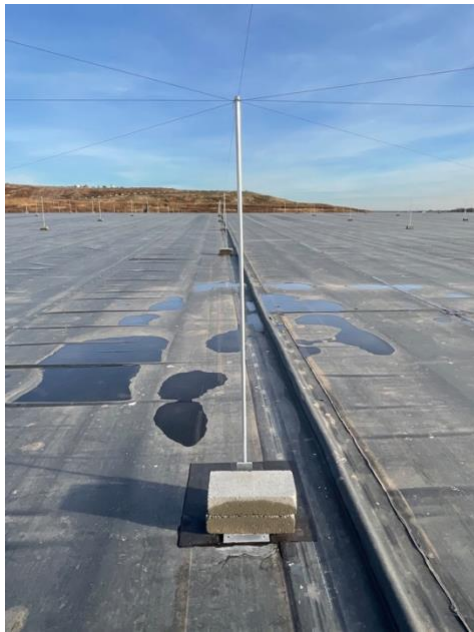

Large Commercial Rooftop Near Landfill

PEST BIRD SPECIES: SEAGULLS

- ✓ Several thousand seagulls traveling over rooftop to landfill.
 - Years of bird droppings and nesting
- ✓ Heavy nesting materials, feathers and seagull droppings on roof.
- ✓ Ample food/water supply in area

BIRD CONTROL METHOD: SEAGULL CONTROL SYSTEM GRID WIRE DETERRENT

- ✓ Custom fabricated aluminum poles (parapet or standalone)
- ✓ Welded receiving pole system
- ✓ Customizable pole height for all applications
- ✓ Stainless steel wire UV coating or Kevlar stranded cord
- ✓ Grid Wire System completely removable
- ✓ ZERO penetrations into the structure
- ✓ Minimal visual impact

PROJECT PHOTOS

Non-penetrating Bracket System

- ✓ TPO slip pad for roof protection
- ✓ Zero penetrations into the structure
- ✓ Complete access to remove system
- ✓ Complete Seagull DETERRENT
- ✓ Applications: commercial roofs, solar panels, solar arrays, ponds, outdoor dining, decks, marinas, boat docks, landfills, dump sites, boardwalks, rooftop dining, pools and more.
