

CASE STUDY – AVIANGLE FOR PARKING GARAGES

Parking Garage in New York

PEST BIRD SPECIES: PIGEONS & SPARROWS

- ✓ Several hundred pigeons and sparrows nesting within parking garage.
 - Years of pigeon and sparrow droppings and nesting
- ✓ Heavy nesting materials on concrete columns, ledges, pipes, light fixtures and metal I-beams throughout the parking garage.
- ✓ Ample food/water supply in area.

BIRD CONTROL METHOD: BIRD EXCLUSION AVIANGLE

- ✓ AviAngle® is a bird exclusion product that completely excludes all wildlife and pest birds from that have natural ledges, like parking garages.
- ✓ The 45-degree angle combined with the smooth PVC surface allows AviAngle® to exclude all bird species, including pigeons, sparrows, starlings, seagulls, and more.
- ✓ UV protected for long term sustainability.
- ✓ Permanent bird exclusion to ensure parking garage is protected.
- ✓ ZERO penetrations into the structure.
- ✓ Minimal visual impact and paintable.

PROJECT PHOTOS

- ✓ Complete bird protection on all ledge-based areas of the parking garage.
- ✓ Complete bird EXCLUSION for all pest birds and wildlife.
- ✓ When birds have nested in a parking garage, only bird exclusion methods like AviAngle® and bird netting will be effective and eliminating the birds. If bird deterrent methods such as bird spikes, bird wire, shock track, bird gel, sound units, fake owls or other visual deterrents are used, the pest bird will continue to be a problem within your parking garage or related structure.
- ✓ Contact Aviaway for all your Bird Control Projects.
